OZGUR OZBEK

Liverpool, United Kingdom — ozgurozbekmsc@gmail.com — 07342782048 — linkedin.com/in/ozgur-ozbek/

SUMMARY

Master's graduate and Full Stack Developer with 3+ years' experience. Expertise in React, CSS, Typescript, Python, C#, and more. Experience in Project Management, optimization and designing systems. Agile problem-solver with high technical aptitude seeking impactful opportunities. Full rights to work in the UK.

EXPERIENCE

Unico Studio — Remote, Palo Alto, USA
Full Stack Web Developer — April 2022 - June 2023

- Spearheaded the development of the 2 product websites; Unico Studio and Age of Brainos, as well as other platforms using a tech stack including JavaScript, HTML, CSS, PHP, Bootstrap, GSAP, and ThreeJS.
- Implemented innovative markdown-based client-side rendering system for dynamic content creation, significantly reducing backend load and improving screen print time by up to 40 times.
- Delivered substantial SEO and performance enhancements to the 3+ websites, resulting in a 1400% traffic increase.
- Collaborated with an agile team utilizing FastAPI and VueJS to implement scheduled updates to the business intelligence side of the company, ensuring a modern, responsive product with continuous improvement.

Devends Technology — Istanbul, Turkey
Software Engineer — October 2021 - March 2022

- Played a key role in developing MVC Web Applications using C#, .NET Core, PostgreSQL, Bootstrap, and React.
- Successfully integrated a WhatsApp messaging feature with Twilio and created an HTML to PDF renderer, streamlining communication and document generation.
- Significantly improved user experience for Colin's e-commerce site across multiple countries, contributing to enhanced customer satisfaction and engagement.

Aeon Tech — Remote, Istanbul, Turkey
Software Engineer, Contract — November 2020 - August 2022

- Produced web services and educated other developers in various projects, including Python, Flask, Django, NextJS, React, HTML, CSS, and JavaScript.
- Contributed to artificial intelligence software, and organized IEEE tech talks showcasing strong technical leadership.
- Trained artificial intelligence models, and provided marketing materials, including brochures and product videos.

TFN Bilisim — Remote, Istanbul, Turkey
IT Project Manager, Co-Founder — September 2019 - February 2021

- Managed the successful development of complex Python-based web applications for fitness salons, restaurants, and property rentals.
- Effectively addressed staff issues and client demands, resulting in improved team morale and customer satisfaction.
- Implemented strategies that enhanced team productivity, development speed, and overall project outcomes.

Toyota Turkey — Sakarya, Turkey
Software Engineer Intern — August 2019 - September 2019

- Developed an internal feedback microservice using native JavaScript and worked on a React application to facilitate company production line observation.
- Collaborated with Toyota Motor Europe through meetings, demonstrating effective communication and problem-solving skills to meet the company's requirements.

PROJECTS

Teothe Web Application *Project Link:* `https://teothe.com/` — 2022 - Ongoing
Revitalized the Teothe Web App as an independent tabletop setting dashboard, implementing a cutting-edge hybrid architecture that seamlessly blended Flask Microservices using Python, SWR, and PWA technologies. This strategic innovation significantly optimized performance, scalability, and reliability, resulting in a remarkable increase of 250% in active users. Engineered the setting dashboard using Next, React, Ant Design, Tailwind, DynamoDB, AWS, SQLite3, and GitHub Actions technologies, elevating the user experience and engagement by 40%.

Quest Idea Generator *Project Link:* `https://xeculus.pythonanywhere.com/` — 2019 - Ongoing
Quest Idea Generator app is a text generator that tries to inspire its users by generating artificially intelligent prompts, Markov chains, algorithm optimizations and machine learning.
